

Land Management Report
April 16,2005
TCC Quarterly Meeting

- **ADOPT AN AREA** – Clubs are encouraged to adopt an area to clean, beautify, and use as a gathering/party area. Brian E. is distributing signs for areas in need of clean up. See Brian to coordinate your area.
- **BRIDGE** – Larry Perry has almost completed the new bridge from the picnic tables to the kitchen. Handrails are the final touches. THANKS Larry for a job well done!
- **An Emergency Plan** is still in the works to address fire, medical, and weather concerns. Mr. Perry and Dan has contacted local the Cameron Volunteer Fire Department Chief and a walk through was done of the campsite. Several suggestions were made to improve fire safety including fire extinguishers for the kitchen and storage of flammable materials. A meeting with Milam County EMS has been planned for the May Activity Weekend with the Lonestar Coordinator.
- **WATER HEATERS** – The two forty gallon hot water heaters located in the shower utility room are in poor condition. They are deteriorating and starting collapse from heavy rust. Estimates from Texas Propane for replacements will be gathered and assessment made for replacement based on the estimate. The other alternative is to purchase the heaters and install them ourselves. Texas Propane installed the original heaters.
